9 months Artsakh was blocked by Azerbaijan and most Armenians starved there after 9 months Azerbaijan army attacked on Artsakh, beheaded people and killed many of them after all more than 100.000 Armenians by force left their house and possession there and fled to Armenia.

ICMM started medical care mission for Artsakh people, we bought needed medicine and provided medical treatment. Because of blockage these people have been malnourished and under stress more then 9 months, most of them got spine, neck and back pain, muscle weakness and other health problems which need long medical care and physical rehabilitation. Medicine bought was distributed among their families as all of them have been affected because of stress. More than 75 treatments done for Artsakh people but needed to be continued.
